**Heather Darrow**  
*Principal*

### **A Dynamic Community**

STEAM is in full swing at Olive Elementary! With science challenges, BYOD in the fourth through sixth grades, Olibots (our robotics club), the Art Club, and Art Masters soon to come, as well as GLAD strategies to support our math instruction, our Olive students are immersed in STEAM opportunities every day.

At Olive, we are committed to providing a 21st-century learning environment for our future leaders. Through the use of technology and hands-on learning experiences, our Olive

students are becoming expert collaborators and problem-solvers!

But the students aren't the only learners on campus. Our teachers are also learning to build their expertise in areas of instructional technology, mathematical explanations, and reading and writing. Always striving to give their best to the students at Olive, our dedicated teachers spend time after school to meet together and bring new and exciting learning experiences to their students. As the new principal of Olive Elementary, I am proud to be a part of this dynamic educational community.
